04	Annual review	All	Dec-2025

KDM Group are committed to utilising best knowledge and processes to ensure we minimise our carbon footprint. We aim to work to achieve beyond the UK's Governments Climate Change Act 2008 which establishes a legally binding target to reduce the UK's greenhouse gas emissions by at least 80% in 2050 from 1990 levels. To drive progress and set the UK on a pathway towards this target, the Act introduced a system of carbon budgets including a target that the annual equivalent of the carbon budget for the period including 2020 is at least 34% lower than 1990.

KDM are committed to regular Carbon Assessments from reputable third parties. These reports will be shared with clients and data incorporated into our annual audited accounts reporting so shareholders and other relevant parties have visibility of our progress.

**Examples of mitigating climate change which KDM utilise to reduce emissions:**

- Reducing the need to travel and providing for sustainable transport
- Providing opportunities for renewable and low carbon energy technologies
- Providing opportunities for decentralised energy and heating
- Promoting low carbon design approaches to reduce energy consumption in buildings, such as passive solar design
- Encourage best practice for utilisation of energy through machinery, plant and utilities.

Further detail of our carbon commitments can be requested from a Director of KDM Group Limited by emailing [Directors@kdmgroup.co.uk](mailto:Directors@kdmgroup.co.uk)
